

Misrepresenting someone's argument to make it easier to attack.

Rollover the icons above and click for examples. If you see someone committing a fallacy online, link them to their fallacy e.g. yourlogicalfallacyis.com/strawman

(we foolishly didn't have this option before as we wanted the posters to be free downloads - and they **still are** - but individual printing isn't very economical - so hooray for you getting a high quality wall poster, and for us making some money to put into our next project).

thou shalt not commit logical fallacies

A logical fallacy is a flaw in reasoning. Strong arguments are void of logical fallacies, whilst arguments that are weak tend to use logical fallacies to appear stronger than they are. They're like tricks or illusions of thought, and they're often very sneakily used by politicians, the media, and others to fool people. Don't be fooled! This poster has been designed to help you identify some of the more common fallacies. If you see someone committing a logical fallacy online, link them to the relevant fallacy to school them in thinkiness e.g. yourlogicalfallacy.com/drawman

@@

Hmm, yes, I would like to order a poster. Take me to your cart! ➤

1. To hang up near your computer for when you are arguing with people on the internet.
2. To put up in your kids' bedroom so that they get all clever and whatnot, and are able to tell the difference between real news and faux news *cough*.
3. To gift, in a slightly passive-aggressive yet still socially acceptable way, to someone who is forever making weak arguments peppered with fallacies.
4. To hang up in a classroom, common room or other public space to make the world a more rational place.
5. Potato.

They're available in both **16x24"** and **24x36"** sizes (no price difference). Check out a pdf preview **here**.
